

Do not just define the word. Write a sentence that uses it correctly AND shows you understand it.

1. Study the map carefully. Answer ALL questions using compass directions (North, South, East, West).

2. Map symbols — write what each symbol stands for AND explain what you would find there:

3. A map shows a place from ABOVE, like a bird looking down. Explain why maps are drawn from above rather than from the side. What information would be LOST if maps were drawn from the side like a photograph? Give TWO specific examples.

4. Maps use symbols instead of drawing everything in detail. Give THREE reasons why this is better. Then explain: what would happen if two symbols on a map looked almost the same? Why is the KEY so important?

5. A new playground is going to be built somewhere on the map above. Using COMPASS DIRECTIONS and the PLACES shown on the map, write a report recommending the BEST location for it. You must: say which location you choose, explain why it is a good position using compass directions, and explain why the other locations would be less suitable.
